

LUCE GUIDA

Brochure

A combination that leads to the creation of an advanced craft in style and features where light and air are the main characters, thanks to the large windows in the hull and in the deckhouse. This craft is perfectly in line with Vismara's style, characterized with high technological standards, modern design, lightweight materials and attention to details which ensure lightness, speed, safety and livability.

All furniture is a structural element, this tremendously benefits the weight and rigidity of the boat.

The special carbon hull, designed with the shape of the new Vismara sport 'Meta', including an under floor lifting keel that does not interfere with the interiors and a generous sail plan, benefits not only the 'easy cruising' but also the race winning potentials.
